

Restaurant Refund and Cancellation Policy

Fictional restaurant policy for an AI project demonstration.

Incorrect or missing item

A customer should report an incorrect or missing item within 24 hours of receiving the order. The restaurant will verify the order and offer a replacement or a refund for the affected item.

Food quality complaint

A food quality complaint should be reported within 2 hours of delivery or collection. The customer should provide the order number and a photo where possible. A manager reviews the complaint before approving a replacement or refund.

Cancellation before preparation

An order can be cancelled for a full refund before the kitchen starts preparing it. Once preparation has started, cancellation requires manager approval.

Refund processing

Approved card refunds are sent to the original payment method. The restaurant initiates the refund within 3 working days. The bank may take additional time to show the amount.

How to request help

Customers should contact the branch, provide their order number, explain the issue, and keep the receipt.
